

# 5 easy and affordable ideas to refresh your space!

1. The old saying “less is more” is never more applicable than when it comes to spring cleaning! now is a great time to reevaluate your closets and cabinets to identify items that you no longer need, wear or have expired. Donate or toss those items and immediately lighten the spring cleaning load!

2. Take a room by room approach to spring cleaning to avoid being overwhelmed by trying to tackle everything in your home at once. It may take several weeks but “eating the elephant one bite at a time” will help you accomplish your cleaning goals with less stress! Many online lists are available to help you determine those tasks most important to you and to keep yourself (and others!) on task!

3. One of the quickest, easiest ways to update your home for spring includes painting your front door! It boosts your curb appeal and updates your exterior immediately! Shades of blues and greens are timeless and the possibilities are endless! If you live in a neighborhood with an HOA, make sure you seek approval first!

4. Paint outdated furniture in your home for a fun way to update and revive a piece you have grown tired of. If the thought of painting it yourself deters you, you can search online for local, reasonably priced furniture refinishers that will do it for you!!

5) Paint or wallpaper an accent wall for a splash or pattern and color especially if you would rather not commit to an entire room, especially if you like changing things up more frequently! Wallpaper is having a huge moment again and peel and stick options can give you more flexibility later when you are ready to make another update!
